

A report on school health program

ART COMPETITION

14th June, 2022

Background

Farming, Health and Environment Nepal Project under Nepal Public Health Foundation successfully facilitated a one-day art competition with support from Balkumari English School. The program was conducted on the theme 'Effects of pesticides on health and environment' to promote the visual representation skills of students.

Objectives:

- To inspire them to become more conscious and aware of pesticides and its effect towards health and environment.

Venue:

Balkumari English School, Bharatpur Metropolitan City, Chitwan

Date:

14th June, 2022, Tuesday

Participants:

15 students, 5 each from grades 8, 9, and 10 from Balkumari English School participated in this initiative. Students who bagged the first, second and third prizes were awarded with certificates of achievement and gifts for further motivation.

Proceeding

The program was initiated with a formal introduction among participants. Project manager Neshan Rai gave a brief insight into our project and its activities, and about our objectives tied to creating a feasible environment for minimizing the use of chemical pesticides. The program then began with remarks from the school principal, Mr. Om Kumar Shrestha and some informative and encouraging words by the trainee teacher (training provided by FHEN to school teachers on 6 and 7 May) Mrs. Bishnu Chhetri program began.

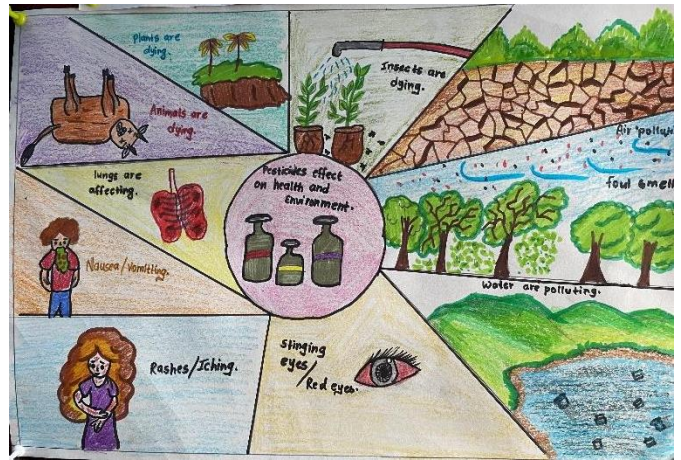

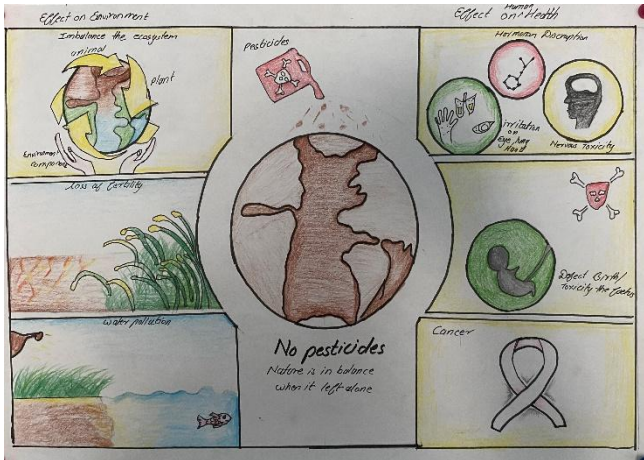

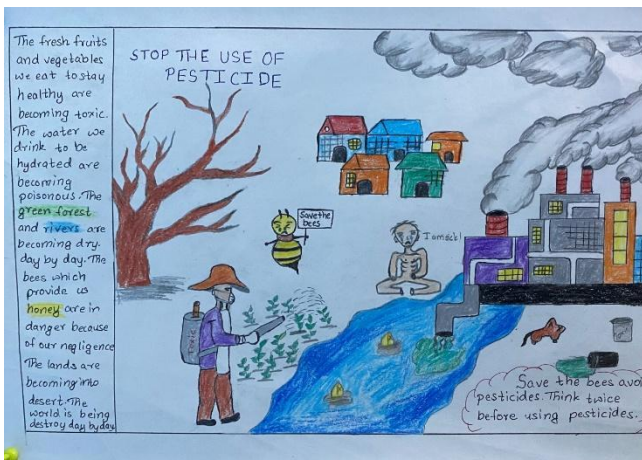

Each participant was given 1 hour 45 mins to complete their task. After the completion FHEN team along with school teachers assessed their art. Students who secured first, second and third positions were rewarded tokens of love and gifts. Certificates were given to those who participated in the art competition.

Name list of participants
